

Boned Garment Care Instructions.

[For lace items](#), please put the blouse or chemise in a lingerie bag when washing (if you have a post in your machine). Make sure that you don't have any hooked clothing (bra) that you wash with it or it will tear up the lace.

I recommend using Dryel to clean and care for any of our [boned garments](#). Remove the leather laces before you put it in the dryer. Follow the directions on the box. It is cheaper and easier on the fabric than dry cleaning. Dry cleaning is NOT recommended as the heat will sometimes melt the plastic tips off the stays which eventually will cause the stays to poke through the fabric.
